## Gränges Americas has been awarded quality certification IATF 16949

Gränges America's facility in Huntingdon, Tennessee, has recently been awarded the International Automotive Task Force (IATF) 16949 certification. The IATF certification is an international standard describing the quality management systems needed to supply highly engineered products within the automotive, transportation, HVAC, energy and electrical industries.

"Quality is of great importance at our Huntingdon facility as we are expanding capacity and will be serving the automotive industry. This award signals our commitment to the highest standards and ensures our customers can rely on delivery of high-quality products", says Patrick Lawlor, President Gränges Americas.

The IATF certification and standards drive the quality management system to provide continual improvement, risk management and defect prevention to ensure continued supply of on time quality products.

Gränges' expansion at its Huntingdon plant remains on schedule with increased capacity available in second half of 2019.
